Zaw Lin Naing (Norman Linn)

Los Angeles, CA · mrzawlinnaing1001@gmail.com · linkedin.com/in/zawlinnaing · github.com/normanlinn · normanlinn.github.io/portfolio

Web developer and El Camino College student with an aviation customer-service background at LAX. I build practical, phone-first web apps with React and TypeScript, and care about clear interfaces, accessibility and automated testing.

Open to remote or part-time web development work.

PROJECTS

LAXCommute · employeeshuttlelax.com

React · TypeScript · Supabase · Cloudflare Workers

- Built and shipped an installable web app (PWA) showing live LAX employee shuttle positions and arrival predictions for the South, East and West lots.
- Serves a same-origin API from Cloudflare Workers, with Supabase processing the third-party tracker feed and storing optional accounts.
- Interactive Leaflet and MapLibre maps, saved commutes, directions in Apple or Google Maps, and English, Spanish and Burmese.
- Covered by 141 automated tests across 27 test files; 50 commits in its first three weeks.

Derivatives Field Guide · normanlinn.github.io/calculus-study-site

Next.js · TypeScript · KaTeX

- Interactive calculus study site for Math 190: 77 practice problems with hints, 8 draggable graphs and an 18-question practice quiz.
- Rebuilt a single 1,500-line HTML page into a statically exported Next.js site, with math rendered at build time by KaTeX.
- Touch-friendly canvas graphs using pointer events, drawn at the screen's pixel density so they stay sharp on phones.

Burman Tea · burmantea.vercel.app

In development

- Mobile-first menu and ordering experience with English and Myanmar typography and a protected staff workspace.

Portfolio · normanlinn.github.io/portfolio

TypeScript · Framer Motion

- Responsive personal site with keyboard-accessible dialogs, dark mode and animation that respects reduced-motion settings.

EXPERIENCE

Aviation Customer Service · Los Angeles International Airport (LAX)

Los Angeles, CA

- Help travelers through changing plans in a fast-moving airport, giving clear information and a next step.
- Communicate with passengers and coworkers under time pressure; this daily experience led directly to building LAXCommute.

EDUCATION

El Camino College

Torrance, CA

- Coursework: C++ programming and data structures; calculus (Math 190).

SKILLS

Languages: TypeScript, JavaScript, HTML, CSS, C++ (coursework)

Frameworks and tools: React, Next.js, Vite, Motion / Framer Motion, Supabase, Cloudflare Workers, Leaflet, MapLibre, KaTeX, Git, GitHub, Vercel

Practices: Phone-first responsive design, progressive web apps, accessibility, automated testing
